Pentagon Bowls

Fabric Requirements: One bowl uses approximately one fat quarter

Baste Fabric to the Pentagons according to the general Paper Piecing Instructions. You will need a total of 12 pentagons with fabric basted to them to create one Pentagon Bowl.

Connect the pentagons according to the figure and then sew the inner sides together to create the three dimensional form:

The top of the bowl is made by sewing the right sides of the fabric together along the inner sides. The fabric will be on the inside of the bowl and the unfinished side showing the papers will be on the outside of the three dimensional form.

Create a second version of the figure, to make the bottom of the bowl, but this time be sure to sew the wrong sides together so that the fabric remains on the outside of the form and the unfinished side showing the papers will be on the inside of the form.

Finish off the bowl by placing the top form into the bottom form and align the points. Sew the top form to the bottom form by using a blind stitch all the way around. Enjoy your new pentagon bowl!
