

# QUEEN QUILT CLASSICS

## HEX100 Diamond Triple Ring

87" x 98"

Total Pieces: 3217 1" hexagons  
66 1" half hexagons

Total Diamonds: 39

One Diamond is made up of one center piece, an inner diamond of eight pieces, a second diamond of 16 pieces, an outer diamond of 24 pieces, and 15 path pieces.

Fabric requirements are based on 2½" squares.

1 Fat Quarter will make 56 2½" squares

Centers: ¼ yards  
39 2½" squares

Diamonds: 48 pieces per diamond  
34 Fat Quarters if you mix & match

Background: 6 yards total  
1306 2½" squares  
66 1½" x 2½" rectangles for the half hexagons.

Binding: 1 yard

Baste fabric to hexagons according to the instructions included in each package. We use squares instead of cutting out fabric hexagons because cutting hexagons is a drag. If you are planning to hand quilt you might want to trim away the corners before removing the paper piece.

You can attach the diamond pieces to the center in any order. I find it fastest to make my pieces into a "circle" leaving one seam open. Then I attach this to my center and sew up the last side. Take careful note of where the 15 path pieces are attached to each flower. You can do this as you go, then it isn't so overwhelming to make gazillions of path pieces at the end.

You can start sewing the diamonds together any time after you have two done. If you wish to make all the diamonds first then plan their arrangement, we suggest you pin them to a sheet (unless you are lucky enough to have a full size design wall).

When you have the body of the top pieced, fill in around the edges with path pieces. There are a number of ways to finish your quilt. Download these instructions under Finishing Methods.

As always, you can call or email if you have questions.
