

# QUEEN QUILT CLASSICS

## HEX125 Double Ring

81½" x 113"

Total Pieces:    2214 1¼" hexagons  
                          44 1¼" half hexagons

Total Flowers:    72

One Flower is made up of one center piece, one ring of six petal pieces, one ring of twelve petals, and eight path pieces.

Fabric requirements are based on 3" squares.

1 Fat Quarter will make 36 3" squares

Centers:            1/2 yard  
                               72 3" squares

Petals:              18 petals per flower  
                               36 Fat Quarters if you mix & match

Background: 6 yards total  
                               846 3" squares  
                               44 2" x 3" rectangles for the half  
                                          hexagons.

Binding:            1 yard

Baste fabric to hexagons according to the instructions included in each package. We use squares instead of cutting out fabric hexagons because cutting hexagons is a drag. If you are planning to hand quilt you might want to trim away the corners before removing the paper piece.

You can attach the “petals” to the center in any order. I find it fastest to make my petals into a “circle” leaving one seam open. Then I attach this to my center and sew up the sixth side. Take careful note of where the eight path pieces are attached to each flower. You can do this as you go, then it isn't so overwhelming to make gazillions of path pieces at the end.

You can start sewing the flowers together any time after you have two done. If you wish to make all the flowers first then plan their arrangement, we suggest you pin them to a sheet (unless you are lucky enough to have a full size design wall).

When you have the body of the top pieced, fill in around the edges with path pieces. There are a number of ways to finish your quilt. Download these instructions under Finishing Methods.

As always, you can call or email if you have questions.
