<p>Total Pieces:    5877 ¾" hexagons                              72 ¾" half hexagons</p> <p>Total Flowers:    111</p> <p>One Flower is made up of one center piece, one ring of six petal pieces, one ring of twelve petals, one ring of eighteen petals, and eleven path pieces.</p>	<p>Fabric requirements are based on 2" squares.          1 Fat Quarter will make 99 2" squares</p> <p>Centers:            1/3 yard                                    111 2" squares</p> <p>Petals:              36 petals per flower                                    42 Fat Quarters if you mix &amp; match</p> <p>Background: 5 yards total                                    1770 2" squares                                    72 1" x 2" rectangles for the half hexagons.</p> <p>Binding:            1 yard</p>
--	---

Baste fabric to hexagons according to the instructions included in each package. We use squares instead of cutting out fabric hexagons because cutting hexagons is a drag. If you are planning to hand quilt you might want to trim away the corners before removing the paper piece.

You can attach the "petals" to the center in any order. I find it fastest to make my petals into a "circle" leaving one seam open. Then I attach this to my center and sew up the sixth side. Take careful note of where the 11 path pieces are attached to each flower. You can do this as you go, then it isn't so overwhelming to make gazillions of path pieces at the end.

You can start sewing the flowers together any time after you have two done. If you wish to make all the flowers first then plan their arrangement, we suggest you pin them to a sheet (unless you are lucky enough to have a full size design wall).

When you have the body of the top pieced, fill in around the edges with path pieces. There are a number of ways to finish your quilt. Download these instructions under Finishing Methods.

As always, you can call or email if you have questions.
