CLASSIC HEXAGON QUILTS

HEX125 Diamond Single Ring

91" x 107-1/2"

Total Pieces: 2365 1¼" hexagons
58 1¼" half hexagons

Total Diamonds: 124

One Diamond is made up of one center piece, an outer diamond of eight pieces, and seven path pieces.

Fabric requirements are based on 3" squares.

Centers: ¾ yards
124 3" squares
Diamonds: 8 pieces per diamond
1 Fat Quarter will make 4 diamonds
31 Fat Quarters for the entire quilt

Background: 9 yards total
1249 3" squares
58 2" x 3" rectangles for the half hexagons.

Binding: 1 yard

Baste fabric to hexagons according to the instructions included in each package. We use squares instead of cutting out fabric hexagons because cutting hexagons is a drag. If you are planning to hand quilt you might want to trim away the corners before removing the paper piece.

You can attach the diamond pieces to the center in any order. I find it fastest to make my pieces into a "circle" leaving one seam open. Then I attach this to my center and sew up the last side. Take careful note of where the seven path pieces are attached to each flower. You can do this as you go, then it isn't so overwhelming to make gazillions of path pieces at the end.

You can start sewing the diamonds together any time after you have two done. If you wish to make all the diamonds first then plan their arrangement, we suggest you pin them to a sheet (unless you are lucky enough to have a full size design wall).

When you have the body of the top pieced, fill in around the edges with path pieces. There are a number of ways to finish your quilt. Download these instructions under Finishing Methods.

As always, you can call or email if you have questions.
